Title

Creating an online form for the Leadership Challenge Center

Student

Munachiso Ogbuchiekwe

Advisor

Dr. Ernesto Gomez

Abstract

The Leadership Challenge Center (LCC) at CSUSB provides team building and leadership programs for CSUSB students, clubs, teams, schools, businesses and the community. To help the LCC a basic online form was needed to help streamline the signing up process. During my internship I worked with the IT Support from the Student Recreation and Wellness Center (SRWC) to build this online form. To build the form we used several components like PHP, HTML, and CSS. We also used an open source PHP framework called CodeIgniter, so we can utilize the MVC architecture. This form will help the LCC staff gather more specialized information and make it easier to set up dates for participants who want to do the LCC.
