Title

Kids That Code

Student

Nathan Rittenhouse

Advisor

Dr. Kerstin Voigt

Abstract

I've been working with the company Kids That Code as they put on professional development classes along with teaching kids through fun games and coding programs. I've been learning about a variety of coding languages mostly focused on Scratch and C++. Scratch is easier to learn for beginners and it is used to program simple computers and robots, such as Raspberry Pi and Lego We-Do. I've enjoyed helping with websites and teaching code.
