School of Computer Science & Engineering
MASTERS PROJECT PRESENTATION**

Date/Time

June 29, 2016 (Wednesday), 2:00 pm

Location

JB 359

Topic

Sound Replacement based on the location

Candidate

Sindhuja Pogaku

Advisor

Dr. Owen J. Murphy

Committee Members

Dr. Ernesto Gomez

Dr. Qingquan Sun

Abstract

The project is to develop an android application which allows the user to change the sound mode automatically based on location. Instead of manually switching the mode when the user changes location, the application will automatically set the mode by itself. The user can add as many locations as required based on their daily life.
