Title

Muhareb Law Group Email System

Student

Rana Tabel

Advisor

David Turner

Abstract

The main objective of this Independent study is to create a working email system for Muhareb Law Group. The requirement was to create an email system that could be logged onto from a desktop, laptop, or smartphone. A basic webmail system was created with PHP and MySQL. The system could retrieve e-mails from a specified e-mail account, show all the mailboxes for the account, retrieve and save e-mail attachments, compose e-mail function, and the ability to delete, reply and forward messages.
