CSE 482 Senior Project Presentation

June 13th 2014

1:30 PM

JB 359

NASA Jet Propulsion Lab

Chadwick Barensfeld

Dr. Turner

For my senior project I will be presenting my job at NASA Jet Propulsion Lab as a Jr. System Administrator. I am part of the Infrastructure and Business IT Systems Operations team which manages over 800 servers on the JPL network. I will present my daily system administration tasks and projects that I'm working on. Some of my tasks include system provisioning, decommissioning, configuration, management, and troubleshooting. Since I have been working at JPL, I have increased my knowledge and understanding of the Linux and Windows operating systems. I look forward to sharing my experience at JPL.
