Title
Patient Database for Onsite Mobile Diagnostics

Student
Pablo Robles

Advisor
Dr. Ernesto Gomez

Abstract

I will be working with Onsite Mobile Diagnostics (OMD) in creating a simple database using accessible software. In the case of OMD, Microsoft Excel, the users will be able to manage their clients using the spreadsheets created specifically for the organization. More importantly the ease of use provided by the macros will allow for quick access to entry creation, clearing entry form, the creation of folders, and the opening of folders.
