Date
Nov 17, 2014

Time
3:00 to 3:30

Place
JB 358

Title
CSE 482 Senior Project

Student
Mahmuda Rumana Mahmud

Advisor
David Turner

Abstract

For my project, I created a web site for the company named Omni Linens. This website is shared with the public as a source of information about the company. For this project, I worked directly under the supervision of Dr. David Turner. The web site provides information, such as, what the company is about, where it is located, what are the products they are offering, what are the prices of the products. It also provides all the forms that the customers need to fill out. Mainly, this web site provides a communication with the customer and the company and the information about their products.
