Title

Anthem AC & Heating Calendar

Student

Christopher Valdez

Advisor

Dr. David Turner

Abstract

I will be presenting my completed project created at Anthem AC & Heating where I interned this past summer and developed a system that has made the communication between dispatchers and technicians more effective. Through Outlook, I created a calendar and synced all technician's schedules. The calendar automatically updates with the dispatchers intakes and notifies technicians. I also installed a wall mounted LCD monitor which displays the calendar in the dispatcher's office. My goal is to help this company excel with the help of technology.
